

Alemany Corridor Safety Project

Developing near, mid, and long-term safety improvements for Alemany Boulevard

SFMTA.com/AlemanySafety

With coordination and funding through the SFCTA's Neighborhood Transportation Improvement Program (NTIP), Supervisor Safai has committed to identifying safety and accessibility improvements on Alemany Boulevard between Sickles Avenue to Rousseau Street. Through this effort, the SFMTA will work with the community in developing near, mid and long-term safety recommendations for the corridor.

Project Goals:

- » Reduce the number of traffic incidences among those who walk, bike and drive on the corridor
- » Recommend near, mid and long-term safety improvements for Alemany Boulevard

Project Background and Context

Every year, dozens of people are killed and hundreds more are seriously injured in San Francisco traffic crashes. Vision Zero is a commitment by the City of San Francisco to end all traffic deaths. Segments of Alemany Boulevard are also on the city's High-Injury Network, the 13 percent of streets that account for 75 percent of severe injury and fatal traffic collisions.

Over a five-year period between October 2014 to September 2019, there were 145 reported injury collisions, of which one was fatal. A large majority, about 80 percent, involved collisions between vehicles. 90 percent of all reported collisions occurred at intersections, while the remaining 10 percent happened midblock.

Next Steps and Timeline

Data analysis and research into existing conditions on Alemany (Fall 2019)

First community open house (December 2019)

Project team will review community feedback and technical analysis to develop safety recommendations for the corridor (January to March 2020)

Second community open house (Spring 2020)

Begin implementation of near-term improvements (Summer 2020)
